Abstract: *Upon acknowledging the environmental problems, a concept of durable development has emerged. Initially formulated and presented during the environmental Conference in 1972 in Stockholm, durable development so becomes recognized at a global level. Durable development brings together environmental objectives as well as socio-economical objectives. Furthermore, it represents a fundamental objective of the European Union. With Romania aderation to the European Union, our country has to align itself to all the standards of the community it joined, so, the concept of durable development has been more and more frequently met and taken into account during economical, social and environmental activities taken place all around the country.*

Key words: *durable development; fruit growing*
